

Baseball and Birthdays

What do baseball teams and birthday cakes have in common? _____

To find the answer, solve the problems on page 6. Then plot the ordered pairs and connect the points. The picture you make will help you solve the riddle. (The answer is upside down at the bottom of this page.)

Answer: They both have batters.

Baseball and Birthdays

- 1 Look at number 1, below. The number in the first column is the X coordinate in an ordered pair.
- 2 Look at the second column. Circle the number in the ones, tens, hundreds, thousands, tenths, hundredths, or thousandths place (or a combination of any two), as indicated in parentheses. The number you circle is the Y coordinate.
- 3 Write the X and Y coordinates in the third column to make an ordered pair. The first one has been done for you.
- 4 Determine the ordered pairs for the rest of the chart.
- 5 Plot the ordered pairs on the graph on page 5 in the order they are given. Then use a straightedge to connect the points in the order you plotted them. Can you solve the riddle?
